Once a journey is designed, equipped and put in process, a new factor enters and takes over. A trip, a safari, an exploration, is an entity, different from all other journeys. It has personality, temperament, individuality, uniqueness. A journey is a person in itself; no two are alike. And all plans, safeguards, policing and coercion are fruitless. We find after years of struggle that we do not take a trip; a trip takes us. John Steinbeck

DRAKE PASSAGE

Feared by many, the 1,000 km (600 miles)-wide waterway connects the Atlantic and Pacific oceans between Cape Horn and the South Shetland Islands. Though bearing the name of the famous English seaman and global circumnavigator Sir Francis Drake, the passage was first traversed in 1616 by a Flemish expedition led by Willem Schouten.

DAILY PROGRAM – Half Moon Is. & Whalers Bay

Tuesday 24th February 2026

Expedition morning

~8:00

Dependent on weather, wind, sea and wildlife conditions, we hope to land and zodiac explore at **Half Moon Island**.

The **Albatross** Zodiac will be called first, followed by the groups Gentoo, Humpback, & Leopard. Zodiac Exploring only will be called last.

Half Moon Island is lying at the entrance to Moon Bay, between Livingston and Greenwich Island. The 2 km (1.2 mi) long island is crescent-shaped and home to approximately 3,300 breeding pairs of Chinstrap penguins. Antarctic terns, skuas, Kelp gulls, Wilson's storm-petrels and Blue-eyed shags also breed at this site. Fur seals are often present on the beaches, along with the occasional Weddell or Elephant seal. The island was known by sealers as early as 1821. On the south west side of the island is the Argentine Camara Station.

Whalers' Bay is the first bay inside Port Foster as you pass through Neptune's Bellows at Deception Island. It was given its name by the French explorer Jean-Baptiste Charcot due to the whaling activities undertaken in this bay in the 1900's. The site has a flat, cinder beach which extends approximately 100 m (330 ft) inland before meeting the steep caldera wall. The buildings include the remains of the Norwegian Aktieselskabet Hektor whaling station and a British Antarctic Survey base which was evacuated in 1967 during an eruption. The BAS base, Station B had been a centre for aircraft operations in 1955-57 and 1959-69. Meteorological and geological research had also been conducted at this site. The beach itself is covered in ash and cinder, under which you can see barrels, whale bones and other artifacts

After
dinner

If conditions permit, we hope to go **CAMPING** at **Leith Cove!**

Campers, please make your way to the dinner promptly at 18:30 and then listen for disembarkation announcements. **Movie Night!**

For those of you remaining on board, settle into the lounge and join us for a screening of **Spy in the Huddle** — a heartwarming and wildly entertaining look at life inside a penguin colony, told from the most undercover perspective

Cuverville Island lies in the Errera Channel, between Rongé Island and the Arctowski Peninsula. The island was discovered by Gerlache's Belgica expedition of 1897-9, and named after a vice-admiral in the French Navy. This small rocky island has vertical cliffs measuring 200 m (650 ft) in elevation with extensive moss cover. Cuverville Island is home to the largest Gentoo penguin colony in the region (5,000 breeding pairs), along with Southern giant petrels, Kelp gulls, Antarctic terns, Snowy sheathbills and South polar skuas.

Neumayer Channel is 26km (16 mi) long and separates Anvers Island from Wiencke Island and Doumer Island. It is bordered on both sides by majestic cliffs, the tallest one being Mount Français at 2825m (9268ft). The south-west entrance was first sighted in 1873 by the German Antarctic Expedition and named Roosen Strait. The channel was later navigated and chartered by the Belgium Antarctic Expedition in 1898 and renamed Chenal de Neumayer after a German geographer and promoter of Polar Explorations.

DAILY PROGRAM – Detaille Island & our transit North begins

Monday 2nd March 2026

Expedition morning

~8:00

Depending on wind, weather, and wildlife conditions we intend to land at **Detaille Island**. The **Humpback** Zodiac Group will be called **first**, followed by the groups Leopard, Albatross & Gentoo. Zodiac exploring only will be going out last.

Detaille Island lies in Lallemand Fjord off Crystal Sound, on the Loubet Coast, east of Adelaide Island. The hut at this site is the British Antarctic Survey's Station W, which was evacuated in 1959 when sea ice and weather made relief by ship impossible. At this time, base personnel closed the station and transferred to Station Y at Horseshoe Island. Research undertaken at Detaille Island site had focused on surveying, geology and meteorology. The hut was cleaned up by BAS in 1996/7.

Drake Passage

Sir Francis Drake was born in Devon, and at the age of 13, he began traveling to the West Indies. Between 1577 – 1580 he sailed around the world – the first Englishman to do so – looting Spanish ships and creating nautical charts of the new territories he navigated. On September 6th, 1577, Drake completed his pass through the Magellanic Straits, however the next day he was caught in a big storm that pushed his ship, The Golden Hind, below 57 degrees' latitude south. It was here that he found the meeting of the Pacific and Atlantic Oceans, the turbulent area that is now known as the “Drake Passage”. This also proved that Tierra del Fuego was not a part of “Terra Australis Incognita”, a fact that the cartographers of those days had refused to accept for a long time.
